## DETAILED ACTION

### *Response to Amendment*

1. This office action is in response to the amendment filed on 03/21/2006. Claims 1-10 are pending in the instant application.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102(e) that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 9 and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Samuel et al (US 6018766), hereinafter referred to as Samuel.

Re claim 9, Samuel discloses a host (*a first communication device*, figure 3, element 35) sending a packet to a router (*a multicast router*, figure 3, element 39) with a message group address E (*second multicast group address*) to a host (*a second communication device*, figure 3, element 38) (*sending a first payload from the first communication device to one or more multicast routers and addressed to a second multicast group address*, column 6, lines 16-21) and each host joining the message group

Art Unit: 2616

to receive a packet (*joining by the second communication device the second multicast group address to receive the first payload from the one or more multicast routers*, column 6, lines 21-25). Samuel discloses a full-duplex communication among hosts by sending and receiving packets (*the first and second communication device participate in a full duplex communication*, column 6, lines 26-33).

Re claim 10, Samuel discloses hosts (*second communication devices*) sending messages to other hosts addressed to the implicit message group (*a first multicast group address*) (*sending a second payload from the second communication device to one or more multicast routers and addressed to a first multicast group address*, column 10, lines 52-59). Samuel inherently discloses a host joining an implicit message group to receive a packet from the multicast routers.

#### ***Allowable Subject Matter***

4. Claims 1-8 are allowed.

#### ***Response to Arguments***

5. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

*Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
